PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building and deploying full-stack web applications, Flutter mobile apps, and machine learning projects. Shipped a free, open-source Flutter application serving 1,000,000+ mosque locations worldwide, with real-time prayer time calculation, an offline-first architecture, and a Cloudflare Workers backend for shared jamaat timetables. Skilled in Python, Flutter/Dart, modern web frameworks, API integration, and cloud deployment. Seeking Software Engineering or ML Engineering roles starting Summer 2027.

EDUCATION

Bachelor of Science in Computer Science

Expected Dec 2027

Iqra University, Airport Campus, Karachi

CGPA: 3.15 / 4.00

Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Operating Systems, Machine Learning

Intermediate in Pre-Engineering

Ayesha Bhawani Govt College, Sindhi Muslim, Karachi

Matric in Biology

Speciss Higher Secondary School, Karachi

TECHNICAL SKILLS

Languages	Python, Dart, JavaScript, SQL, C++, Java
Frameworks / Libraries	Flutter, Flask, FastAPI, scikit-learn, Pandas, NumPy, OpenCV

Deployment & Cloud

Docker, Azure, Vercel, Railway, Cloudflare Pages, Cloudflare Workers, Workers KV, Git

Web & Concepts

REST APIs, OAuth 2.0, SEO Optimization, OOP, Machine Learning, Computer Vision, OpenStreetMap / Overpass

Databases	MySQL, SQLite, SQL Server

PROJECTS

Majid Finder — Mosque, Prayer Times & Qibla Application

2026

Lead Developer — Flutter, Dart, Cloudflare Workers, Workers KV, OSM / Overpass

- Designed and shipped a free, open-source Flutter app (web + Android) serving 1,000,000+ mosque locations worldwide.
- Implemented real-time prayer time calculation using Karachi and Umm al-Qura calculation methods.
- Built an offline-first static mosque dataset with Overpass/OSM live data integration.
- Developed a WMM2025-based Qibla compass with magnetic declination correction.
- Architected a Cloudflare Pages (FaaS) backend with Workers KV for shared jamaat timetables synced across devices.

Toolbox — Multi-Tool Web Platform

Jan 2026 — Present

Lead Developer — Python, Flask, Docker, Vercel, Railway, SQL, REST APIs

- Developed and deployed web platform at toolboxonline.app offering 25+ integrated utility tools.
- Integrated background removal, media utilities, and multi-provider AI processing capabilities.
- Implemented Google OAuth, secure user authentication, usage rate limiting, and Stripe subscription flow.
- Optimized platform for SEO best practices and managed cloud deployment via Docker, Railway, and Vercel.

Speed Camera — Computer Vision Speed & License Plate Recognition

Jun 2026 — Aug 2026

Developer — Python, OpenCV, Object Detection, OCR

- Built computer vision pipeline for vehicle detection and license plate recognition.
- Implemented character recognition (OCR) and vehicle tracking across consecutive video frames.
- Applied image preprocessing techniques to improve recognition under variable environmental conditions.

EXPERIENCE

Freelance Full-Stack Developer

2025 — Present

Self-Employed

- Built custom web and mobile solutions using Flutter, Dart, and Python backends.
- Deployed client applications across Vercel, Railway, and Azure cloud environments.
- Implemented SEO optimization, responsive layouts, and API integrations for 5+ small business clients.

CORE COMPETENCIES

Full-Stack Development • Mobile Applications (Flutter) • Cloud Deployment • Machine Learning • SEO Optimization
