PROFESSIONAL SUMMARY

Flutter Developer and Computer Science undergraduate with hands-on experience building and deploying cross-platform mobile applications using Flutter and Dart. Shipped a free, open-source Flutter app (web + Android) covering 1,000,000+ mosque locations worldwide, with real-time prayer time calculation and an offline-first architecture. Strong command of Dart, Flutter widgets, state management, REST API integration and JSON handling. Proficient with Git and GitHub, with working knowledge of Firebase and of translating Figma / Adobe XD designs into Flutter widgets. Committed to clean, reusable, well-documented code and clear English communication in remote teams.

Availability: Open to work, immediate start | Internship , Remote, work from home or onsite

TECHNICAL SKILLS

Languages: Dart, JavaScript, Python, SQL, C++, Java

Flutter & Mobile: Flutter, Dart, Stateless & Stateful Widgets, Custom & Reusable Widgets, State Management (Provider, Riverpod, Bloc, GetX), Navigation & Routing, Responsive Layouts, Material / Cupertino Design, Animations, Forms & Validation, Async/Await, Streams, Play Store & App Store Publishing

Backend & Integration: REST API Integration, JSON Parsing & Serialization, Firebase, Cloudflare Workers, Workers KV, Python (Flask, FastAPI), OAuth 2.0, WebSockets, Third-Party Libraries & Packages

Databases: PostgreSQL, MySQL, SQLite, SQL Server, Firebase Realtime Database, Cloud Firestore

Deployment & Cloud: Docker, Azure, Vercel, Railway, Cloudflare Pages, Cloudflare Workers, GitHub Actions (CI/CD)

Tools & Workflow: Git, GitHub, Figma, Adobe XD, Android Studio, Visual Studio Code, Firebase Console, Postman, Linux

Practices & Concepts: Offline-First Architecture, OOP, Performance Optimization, Debugging & Bug Fixing, UI/UX Implementation, SEO Optimization, Machine Learning, Computer Vision, OpenStreetMap / Overpass

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer 2025 – Present
Self-Employed, Karachi, Pakistan

- Build cross-platform mobile applications with Flutter and Dart for web and Android, including custom widgets, state management and responsive UI.
- Integrate REST APIs and third-party libraries, handling JSON request/response payloads, authentication flows and error states.
- Identify and fix bugs, profile application performance, and improve app responsiveness and asset loading.
- Translate UI/UX designs into pixel-accurate Flutter widgets and reusable components.
- Write clean, well-documented code and manage version control with Git and GitHub.
- Deploy client applications on Vercel, Railway, Azure and Cloudflare Pages using Docker.
- Delivered SEO optimization, responsive layouts and API integrations for 5+ small business clients.

PROJECTS

Majid Finder – Mosque, Prayer Times & Qibla Application
Flutter, Dart, Cloudflare Workers, Workers KV, OpenStreetMap / Overpass

- Designed and shipped a free, open-source cross-platform Flutter application (web + Android) covering 1,000,000+ mosque locations worldwide.
- Implemented real-time prayer time calculation using the Karachi and Umm al-Qura methods.
- Built an offline-first static mosque dataset combined with live Overpass / OpenStreetMap data.
- Developed a WMM2025-based Qibla compass with magnetic declination correction.
- Architected a Cloudflare Pages backend with Workers KV for jamaat timetables shared and synced across devices.
- Integrated third-party packages for geolocation, magnetic sensors and background data processing.

Toolbox – Multi-Tool Web Platform (toolboxonline.app)

Lead Developer | Python, Flask, Docker, Vercel, Railway, SQL, REST APIs

- Developed and deployed a web platform with 25+ integrated utility tools.
- Integrated background removal, media utilities and multi-provider AI processing.
- Implemented Google OAuth, secure user authentication, usage rate limiting and a Stripe subscription flow.
- Applied SEO best practices and managed cloud deployment with Docker, Railway and Vercel.

Speed Camera – Computer Vision Speed & License Plate Recognition

Python, OpenCV, Object Detection, OCR

- Built a computer vision pipeline for vehicle detection and license plate recognition.
- Implemented OCR-based character recognition and vehicle tracking across consecutive video frames.
- Applied image preprocessing techniques to improve recognition under variable environmental conditions.

EDUCATION

Bachelor of Science in Computer Science Expected Dec 2027

Iqra University, Airport Campus, Karachi | CGPA: 3.15 / 4.00

Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Operating Systems, Machine Learning

Intermediate in Pre-Engineering | Ayesha Bhawani Govt College, Sindhi Muslim, Karachi

Matric in Biology | Speciss Higher Secondary School, Karachi

LEADERSHIP

Vice President, Computing and Emerging Technologies Society | Iqra University, Airport Campus

LANGUAGES

English (professional working proficiency) | Urdu (native)
