PROFESSIONAL SUMMARY

Junior Flutter Developer and Computer Science undergraduate with hands-on experience building and deploying cross-platform mobile applications using Flutter and Dart. Shipped a free, open-source Flutter app (web + Android) serving 1,000,000+ mosque locations worldwide with real-time prayer time calculation and an offline-first architecture. Strong understanding of Dart, Flutter widgets, state management, REST API integration, and JSON handling. Proficient with Git and GitHub, with working knowledge of Firebase and translating Figma / XD designs into Flutter widgets. Committed to writing clean, reusable, well-documented code and to clear English communication in remote teams.

CORE COMPETENCIES

Flutter & Dart | Cross-Platform Mobile App Development | Flutter Widgets & State Management | REST API Integration | JSON Parsing & Serialization | Third-Party Libraries & Packages | Firebase | Performance Optimization | Debugging & Bug Fixing | Clean, Reusable & Documented Code | Figma / XD to Flutter | Play Store & App Store Publishing | Git & GitHub | Offline-First Architecture | UI/UX Implementation | English Communication

TECHNICAL SKILLS

Languages Dart, JavaScript, Python, SQL, C++, Java

Flutter & Dart

Flutter, Dart, Widgets, Stateless & Stateful Widgets, State Management (Provider, Riverpod, Bloc, GetX), Navigation & Routing, Custom & Reusable Widgets, Responsive Layouts, Material / Cupertino Design, Animations, Forms & Validation, Async/Await, Streams

Backend & Integration

REST APIs, JSON, Firebase, Cloudflare Workers, Workers KV, Third-Party Libraries & Packages, Python (Flask, FastAPI), OAuth 2.0, WebSockets

Tools & Workflow

Git, GitHub, Figma, Adobe XD, Android Studio, Visual Studio Code, Firebase Console, Postman, Linux

Deployment & Cloud

Docker, Azure, Vercel, Railway, Cloudflare Pages, Cloudflare Workers, Workers KV, GitHub Actions (CI/CD)

Databases MySQL, SQLite, SQL Server, Firebase Realtime Database, Cloud Firestore

Web & Concepts

REST APIs, JSON, SEO Optimization, OOP, Machine Learning, Computer Vision, OpenStreetMap / Overpass

EDUCATION

Bachelor of Science in Computer Science Expected Dec 2027
Iqra University, Airport Campus, Karachi

CGPA: 3.15 / 4.00

Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Operating Systems, Machine Learning

Intermediate in Pre-Engineering
Ayesha Bhawani Govt College, Sindhi Muslim, Karachi

Matric in Biology
Speciss Higher Secondary School, Karachi

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer 2025 - Present

Self-Employed - Karachi, Pakistan

- Build cross-platform mobile applications using Flutter and Dart for web and Android, covering custom widgets, state management, and responsive UI implementation.
- Integrate REST APIs and third-party libraries, handling JSON request/response payloads, authentication flows, and error states.
- Identify and fix bugs, profile application performance, and improve app responsiveness and asset loading.
- Translate UI/UX designs into pixel-accurate Flutter widgets and reusable components.
- Write clean, reusable, well-documented code and maintain version control with Git and GitHub.
- Deploy client applications across Vercel, Railway, Azure, and Cloudflare Pages using Docker.
- Implemented SEO optimization, responsive layouts, and API integrations for 5+ small business clients.

PROJECTS

Majid Finder - Mosque, Prayer Times & Qibla Application 2026

Flutter Developer - Flutter, Dart, Cloudflare Workers, Workers KV, OSM / Overpass

- Designed and shipped a free, open-source cross-platform Flutter application (web + Android) serving 1,000,000+ mosque locations worldwide.
- Implemented real-time prayer time calculation using Karachi and Umm al-Qura calculation methods.
- Built an offline-first static mosque dataset with Overpass/OpenStreetMap live data integration.
- Developed a WMM2025-based Qibla compass with magnetic declination correction.
- Architected a Cloudflare Pages (FaaS) backend with Workers KV for shared jamaat timetables synced across devices.
- Integrated third-party packages for geolocation, magnetic sensors, and background data processing.

Toolbox - Multi-Tool Web Platform Jan 2026 - Present

Lead Developer - Python, Flask, Docker, Vercel, Railway, SQL, REST APIs

- Developed and deployed web platform at toolboxonline.app offering 25+ integrated utility tools.
- Integrated background removal, media utilities, and multi-provider AI processing capabilities.
- Implemented Google OAuth, secure user authentication, usage rate limiting, and Stripe subscription flow.
- Optimized platform for SEO best practices and managed cloud deployment via Docker, Railway, and Vercel.

Speed Camera - Computer Vision Speed & License Plate Recognition Jun 2026 - Aug 2026

Developer - Python, OpenCV, Object Detection, OCR

- Built computer vision pipeline for vehicle detection and license plate recognition.
- Implemented character recognition (OCR) and vehicle tracking across consecutive video frames.
- Applied image preprocessing techniques to improve recognition under variable environmental conditions.

ADDITIONAL INFORMATION

Languages: English (professional working proficiency), Urdu (native). | **Availability:** Summer 2027 | **Work Mode:** Remote / Work From Home | **Portfolio:** https://huzaifa-zuberi.github.io/portfolio/
